Since the first steps of human life, mankind has observed outer space with perpetual questions yet to be answered. Mysteries of the universe are one of the foremost enigmas which today still awakens our curiosity.

What came before the Big Bang? Are there other universes? How do massive stars evolve? These questions, among others, have driven humankind in an ongoing race to discuss and understand the origin and fate of the cosmos. And the need to respond to these pressing questions have resulted in great discoveries and advances in science and technology.

It was long thought that conquering Space would not be possible, however, humans finally landed on the moon and with that milestone great progress just began.

Since then, many other missions have followed and with every new one, remarkable advances and knowledge have been achieved.

Inspired by science and committed to progress, Enigma Surfaces has succeeded in its singular technological race to innovate and improve engineered stone. Just like the conquest of Space, Enigma Surfaces has outlined a paradigm shift, revolutionizing once again the stone sector, breaking the rules to evolve.

How do our raw materials originate? Does our product have any limits? How will our new patterns and finishes perform?

COLLECTION

TRUE NATURAL **BEAUTY**

THE EVOLUTION OF NEW PATTERNS THANKS TO A NEW TECHNOLOGY

Focusing efforts on effective progress, Enigma Surfaces uncovered the puzzle of printing technology being applied to engineered stone and resolved the mystery to produce an eternally flawless design.

Supernatural color, veining and texture with a real natural appearance.

NEOS

Interstellar has extremely excellent physical parameters (NEOS) against stains, keeping the surface clean with minimal maintenance

CLOSE TO 1MM INK DEPTH

The ink is integrated into the body of the slab nearly 1mm under the surface.

SUPER HD PRINT

Unsurpassable high-definition sharpness.

thanks to an even purer translucency, providing each pattern with a deeper visual

SUPER EASY FABRICATION

Interstellar can be fabricated incredibly smoothly, reducing the feed rate is therefore not necessary when cutting and the quality of the product avoids cracking and breaking.

ETERNAL COLOR

Color remains unchanged over time.

DEPTH AND **TRANSLUCENCY**

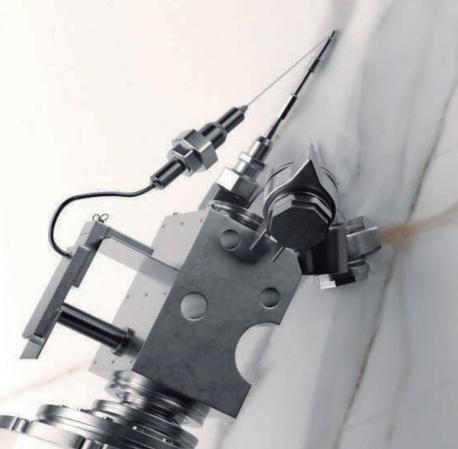

Supreme authenticity strength.

INKPOSSIBLE

Deep Printing Technology

After tremendously challenging research, our R&D department has developed a high-tech process that is able to optimize the use of ink to create a new era of engineered stone. Based on a robotic 3D engraving system, allowing the ink to penetrate approximately 1mm into the slab which dramatically improves the

performance of the printed design. This provides the product with improved properties and aesthetics, making the design stable and resistant to ageing. A discovery that combines with Interstellar Collection by Enigma Surfaces new features, bringing an added value to its current fantastic characteristics.
